ATTN: HIRING MANAGER

Attn: Hiring Manager,

I am a passionate and life-long creator, nerd, and learner. My broad experience includes 5 years in the front of house service industry and 3 years of experience in the back of house as a fine dining cook, a warehouse worker, 3rd shift animal care expert at a pet hotel, my entire adult life as a performer/musician/writer/editor/producer/etc., and even a brief stint as a farm hand while traveling and working abroad in Australia. This wide life-experience has led me, in a roundabout but satisfying way, to my transition into the tech and programming field, starting with my full-stack development training at MAX Technical Training's Cincy Code IT Java Bootcamp.

I have a deep belief in the power of technology to solve and assist in modern problems, and I am eagerly looking forward to becoming a part of these solutions and teams, and to joining a wider community of creators, nerds, and learners.

Best,
Nate Perkins

OBJECTIVE

Recently I moved to NYC from Cincinnati, OH to seek work as a Junior Developer. My objective is simple: Begin my career as a developer, and become a part of the larger community of passionate creators of content in this ever-changing and expanding field.

SKILLS

Front End
Angular 5, jQuery, Bootstrap 4, GreenSock, TypeScript, JavaScript ES5/6, CSS 3, HTML 5

Back End
Spring (Boot, MVC, Web), Java 8/9, Maven, RESTful Web Services, Hibernate, JPA, JDBC

Database
SQL, MySQL

Hosting
Heroku, ClearDB, Firebase

Currently Learning
Unity Game Engine, Node, ReactJS, C#, 3d modeling through Blender, Android Studio, Xcode, how to make the perfect steak

Other Notable Skills
Music Production, Creative/Technical Writing, Communication and Customer Interaction, Basic Video Editing

PROJECTS

PURCHASE REQUEST SYSTEM • CAPSTONE PROJECT
The Purchase Request System is a full-stack, enterprise level, single page application that was completed as the capstone project for my training at MAX Technical Training's Cincy Code IT Java Boot Camp. This project was selected for our graduation presentation. It utilizes a MySQL database that communicates with a RESTful Java/Spring Boot application. The front-end utilizes Angular 5 to create a fast, streamlined SPA that makes calls to the backend architecture to organize and display information.
**The code is available on my github account as a pinned repository (prs-web & prs-ng)

CINCINNATI DIY WRITERS SITE • PERSONAL PROJECT
I designed, built, and hosted a site for a writers/publishing group in Cincinnati that I was a member of. It utilizes a very similar architecture to the Purchase Request System, though demonstrates a noticeable leap in my understanding of the Spring and Angular frameworks, as well as a deeper grasp of design through the use of Bootstrap 4, and other CDN based JavaScript libraries.
** The site can be reached at https://cincinnati-diy-writers-site.firebaseapp.com/home.
**The code is available on my github account as a pinned repository (cdw-web & cdw-ng)

EDUCATION

CERTIFICATE: FULL-STACK DEVELOPMENT • 05/18 • CINCY CODE IT JAVA BOOTCAMP
A 2.5 month, near 500 hour, full-time intensive class room environment that teaches Full-Stack Development with Java as a server-side language. I was the sole organizer of weekly coding challenges/study sessions outside of class time that saw full attendance for 10 of the 12 weeks during the program, and my capstone project was selected for demonstration on graduation day.

BSS IN NARRATIVE STRUCTURE • 12/15 • OHIO UNIVERSITY
I received a specialized degree in narrative structure in fiction, non-fiction, film, poetry, and theater. I was deeply involved in student groups that organized and produced weekly plays, and was instrumental in the writing and production of several student films. My fiction was recently published in a collection of short fiction entitled "The Cincinnati Corpatria".

CERTIFICATE: AUDIO ENGINEERING • 01/10 • THE RECORDING WORKSHOP
I attended and completed a 3 month program focused on the art of sound design, audio recording, and sound theory from The Recording Workshop in Chillicothe, OH. I currently operate a small project studio from my apartment where I write and record my own music, as well as record and mix for friends and other local musicians.
